The image displays the SAP HANA Cloud monitoring interface. At the top, it shows '1 node' and '0 replicas'. A dropdown menu is open, listing options: 'Manage Configuration', 'Open SQL Console', 'Copy SQL Endpoint' (highlighted with a blue border), and 'Copy Instance ID'.

The main interface is titled 'Database Overview' and 'LaPluma (DBADMIN)'. It includes a search bar and a 'Monitoring' section. The 'Monitoring' section contains several panels:

- Services:** Shows '1 host' and 'All services are running'.
- Alerts:** Shows 'No current alerts'.
- Memory Usage:** Shows 'Used Memory' and 'Resident Memory' with a bar chart.
- CPU Usage:** Shows a line chart with 'CPU Usage: 169 % max'.
- Disk Usage:** Shows 'Total: 2.87 GB / 119.94 GB' and a bar chart for Data, Log, and Trace.
- SQL Statements:** Lists recent SQL statements and their execution times.
- Sessions:** Shows 'Total: 1' and 'Running: 0'.
- Admission Control:** Shows 'Accepting requests'.

The bottom right corner shows 'Connections to SAP HANA Cloud'.
